## AWS Certified Cloud Practitioner

### Breakdown of Exam Results

The information in the table below details the composition of the AWS Certified Cloud Practitioner and your performance in each of the exam sections. The table includes the classifications of your performance at each **section level**.

This information is designed to provide general feedback concerning your examination performance. The examination is scored using a compensatory scoring model, which means you do not need to “pass” the individual sections. Please keep in mind that each section has a specific weighting on the examination, so some sections have more questions than others. This information is general in nature, highlighting your strengths and weaknesses.

**Meets Competencies:** Performance at this level demonstrates knowledge, skills, and abilities expected of a passing candidate.

**Needs Improvement:** Performance at this level does not demonstrate knowledge, skills, and abilities expected of a passing candidate.

Score Performance			
Section	% of Scored Items	Needs Improvement	Meets Competencies
Domain 1: Cloud Concepts	26%		
Domain 2: Security and Compliance	25%		
Domain 3: Technology	33%		
Domain 4: Billing and Pricing	16%		

Disclaimer: AWS Certification exams are designed to make pass/fail decisions based on the total exam score. Section level results are designed to provide direction on areas where a candidate may be weak. Candidates should exercise caution when interpreting the above section level score information as it is less reliable than the total exam score and not intended to guide future test performance.
